"Old Age" Dependency Ratio

Sources: United Nations Population Division, World Bank, Baxter Consulting Group calculations

What is a dependency ratio?

An "old age" dependency ratio is the number of people age 65+ per 100 "working age" people age 20-64. It is therefore intended to measure burden on the working population to provide pensions and support for retirees.

How does Japan compare?

The old age dependency ratio in Japan is 47.0. This means there are 47.0 people age 65+ per 100 people age 20-64. Based on this ratio, Japan ranks #1 out of 201 nations and territories in the world, and #1 out of 8 in Eastern Asia, in terms of pressure on working populations to support retirees.

Median Age: 1970-2040

In 2015, the median age in Japan was 46.5. The country ranks #1 out of 201 nations and territories in the world, and #1 out of 8 in Eastern Asia.
