## "Old Age" Dependency Ratio

Sources: United Nations Population Division, World Bank, Baxter Consulting Group calculations

### What is a dependency ratio?

An "old age" dependency ratio is the number of people age 65+ per 100 "working age" people age 20-64. It is therefore intended to measure burden on the working population to provide pensions and support for retirees.

### How does Costa Rica compare?

The old age dependency ratio in Costa Rica is 14.7. This means there are 14.7 people age 65+ per 100 people age 20-64. Based on this ratio, Costa Rica ranks #75 out of 201 nations and territories in the world, and #2 out of 8 in Central America, in terms of pressure on working populations to support retirees.

## Median Age: 1970-2040

In 2015, the median age in Costa Rica was 31.4. The country ranks #76 out of 201 nations and territories in the world, and #1 out of 8 in Central America.
